

dbaDIRECT

# Database Operations Services

You manage the business,  
we manage the infrastructure.

dbaDIRECT provides continuous, 24X365 database operation services for Oracle, SQL Server, Sybase, DB2 and MySQL. From small startups to global enterprises, our customers have different database administration (DBA) needs. dbaDIRECT has developed three scalable services designed for continuous database administration. Whether you are a small business that needs essential DBA services (Continuous Service Assurance) or a large enterprise needing dedicated teams (Enterprise Service Assurance), dbaDIRECT has your solution. And, for any additional services that may be needed, you have as-needed access to our ONdemand Services.

## Custom Service Options

Comprehensive

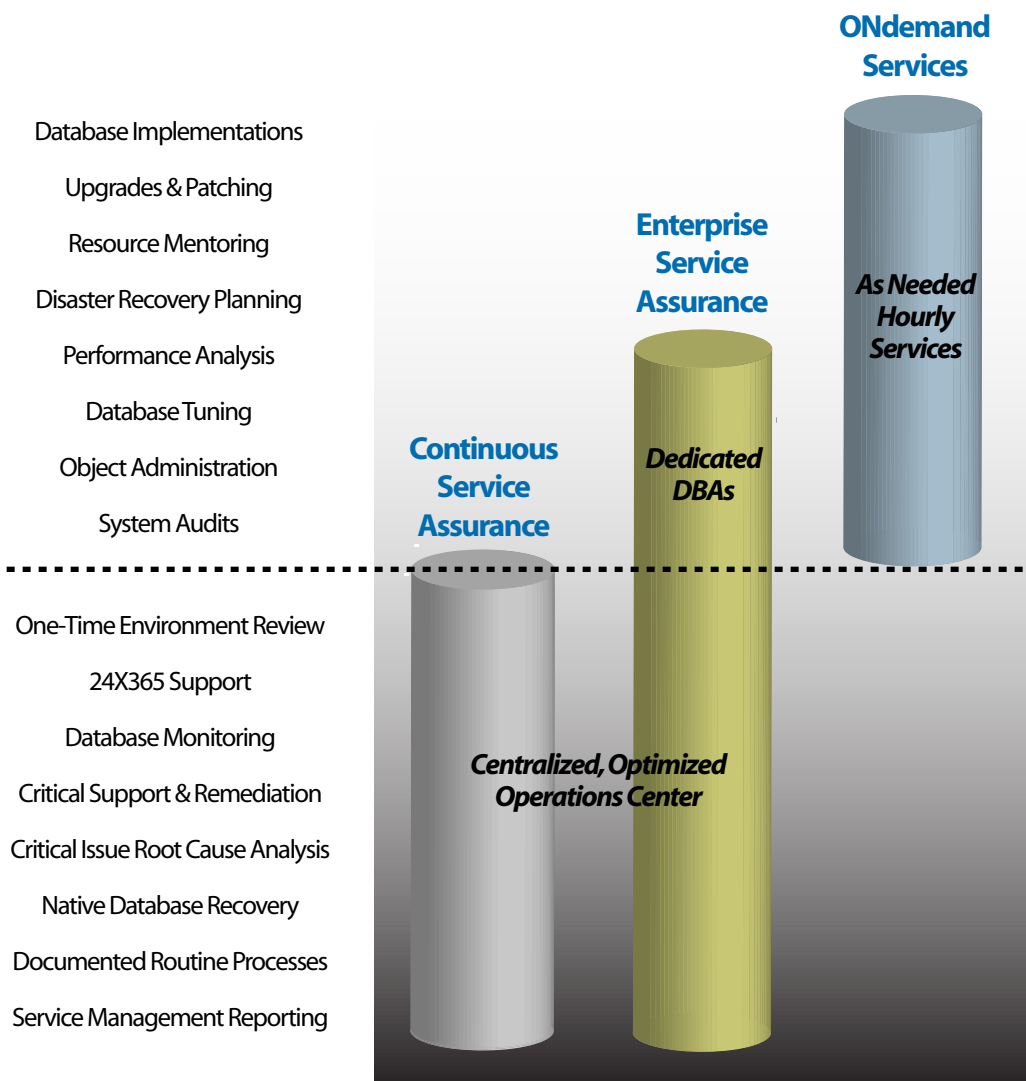

Cost Efficient

Fast & Reliable

Enhance your operation with dbaDIRECT's **Data System Projects** and **DBA Staffing Services**. Whether you use dbaDIRECT as your DBA or just need some extra help, we can help with one-time data infrastructure initiatives.

Cincinnati-based dbaDIRECT® is the pioneer and leader in data infrastructure management services. Enterprise IT organizations turn to dbaDIRECT to gain significant increases in service, quality, consistency and coverage.
